South on East bound see 1
34.35 Set $\frac{1}{4}$ sec post in alder swamp
where raised a Mound.

74.35 Set post Cor. sec. 1. 12
W. oak 28 N 46 $\frac{3}{4}$ W 211
Do 11 N 58 W 219

Saw all swamp - most of
South half but little brush

Var. of this line $5^{\circ}45'$ E

I added on 16' to the true Var.
to construct a very great ten-
dency of the lines to converge
which was found by the random
north — Suspecting the accuracy
of my first observation I observed again
on the night of the 18 near Town Cor. and found
it to exactly correspond, viz. $5^{\circ}29'$

Said nearly a cranberry marsh
Island very poor land

I regret since finishing this line of towns that
I had not run the two preceding E & W. lines
over again at a greater var. — I should have
done so at the time I run them had I not
supposed, running as I was so near at right
angles with the true Meridian — that the work
would finally close better on the other — at the
west bound of the district — and further it was
my intention at that time (pursuant to my
instructions as I supposed) to run all my lines

32 observed and found Var

to be $5^{\circ} 31'$ — but can make

no use of a true meridian

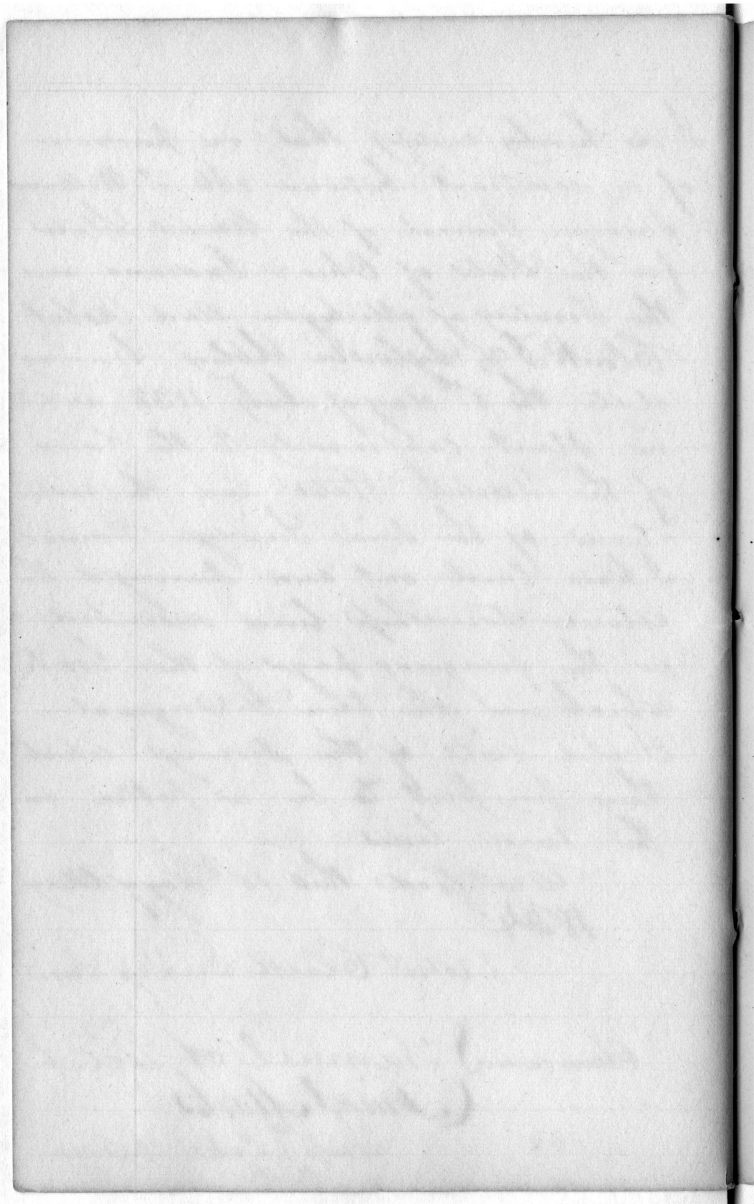

in closing these old surveys

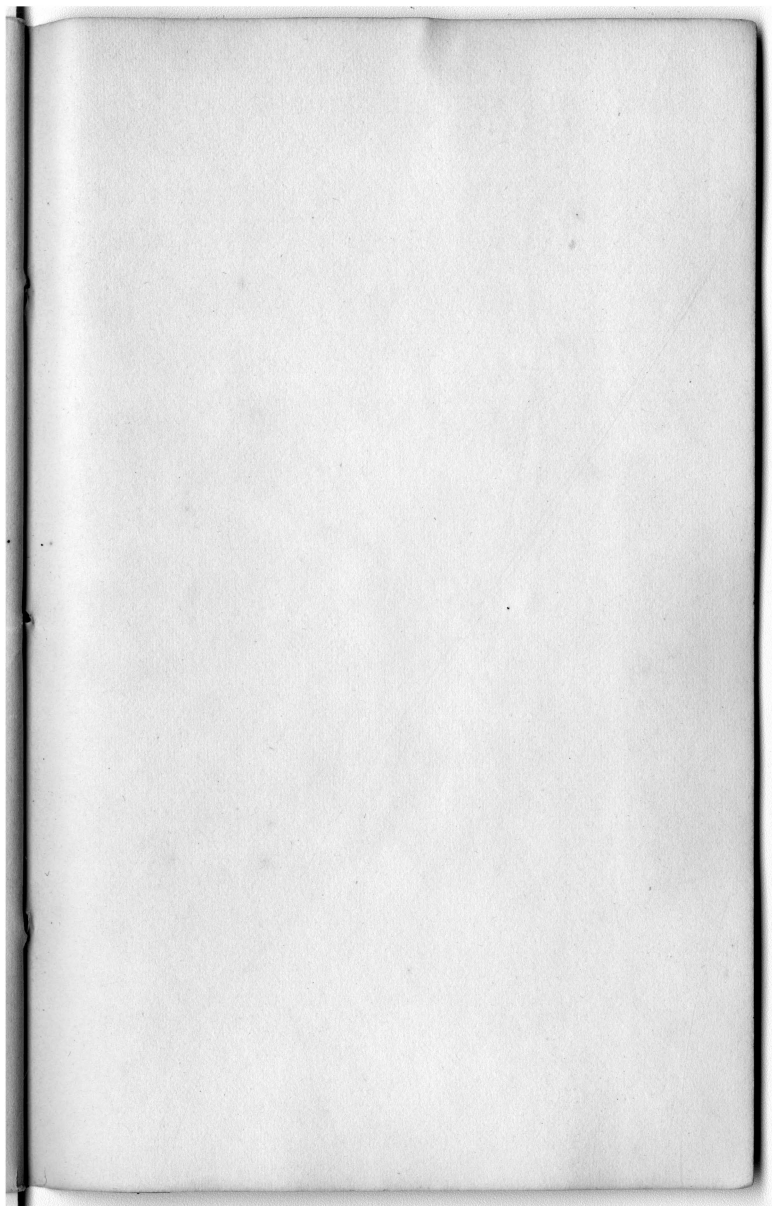

I do hereby certify that in pursuance
of a contract between Mr. T. Williams
Surveyor General of the United States
for the States of Ohio & Indiana and
the Territory of Michigan and Robert
Clark & Sylvester Ubley, bearing
date the 1st day of July 1833, and
in strict conformity to the laws
of the United States and the instruc-
-tions of the said Surveyor General
I have laid out and Surveyed the
exterior township lines described
in the foregoing pages of this book
which are the true & Original
Field notes of the Survey which
they purport to be as taken on
the said lines

Certified this 10th day of May
1834
